

Modern SecOps Envisioning Workshop

Gain a bird's eye view across your enterprise with SIEM for a modern world.

Engagement highlights

Understand the features and benefits of Microsoft Sentinel and Unified SecOps Platform

Gain visibility into threats across email, identity, endpoints, and non-Microsoft data

Better understand, prioritize, and mitigate potential threat vectors

Create a defined deployment roadmap based on your environment and goals

"With everything running through Microsoft Sentinel, we've reduced the time spent on case management and resolution of alerts by approximately 50 percent"

-Stuart Gregg,
Cyber Security Operations Lead, ASOS

As IT becomes more strategic, the importance of security grows daily. Security information and event management (SIEM) solutions built for yesterday's environments struggle to keep pace with today's challenges—let alone tomorrow's unimagined risks.

That's why Microsoft developed Microsoft Sentinel, a fully cloud-native SIEM.

See and stop threats with a Modern SecOps Envisioning Workshop before they cause harm

Get a birds-eye view across all data ingested and detect threats using Microsoft's analytics and threat intelligence. Investigate threats with artificial intelligence and hunt for suspicious activities.

Get an overview of Microsoft Sentinel along with insights on active threats to your Microsoft 365 cloud and on-premises environments with a Modern SecOps Envisioning Workshop.

An engagement designed to meet of your security operations needs

Using a modular approach, we will allow you to customize the engagement to meet your specific security operations needs.

Threat exploration

If your organization is interested in learning how to integrate Microsoft Sentinel in your existing SOC by replacing or augmenting an existing SIEM, we will work with your SecOps team and provide additional readiness to bring them up to speed.

Remote monitoring (optional)

If your organization doesn't have its own security operations center (SOC) or if you want to offload some monitoring tasks, we will demonstrate how Swiss Post Cybersecurity can perform remote monitoring and threat hunting for you.

Engagement objectives

Through this engagement, we will work with you to:

- + **Get hands-on experience** and learn how to discover and analyze threats using Microsoft Sentinel and the Unified SecOps Platform. Learn how to automate your Security Operations to make it more effective.
- + **Gain visibility into threats** to your Microsoft 365 and Azure clouds and on-premises environments across email, identity, endpoints, and third-party data to better understand, prioritize and mitigate potential cyberattack vectors.
- + **Help you understand** how Microsoft Sentinel and Defender XDR security products can help you mitigate and protect against the threats found during the period of this engagement.

In addition, depending on the selected scenario, you will also:

Experience the benefits of a managed SIEM with a true cloud native SIEM, managed and monitored by our cybersecurity experts.

Receive hands-on experience, learn how to discover and analyze threats using Microsoft Sentinel and how to automate your Security Operations to make it more effective.

What we'll do

Analyze customer's requirements and priorities for a SIEM deployment and define Customer's Success Criteria

Define scope & deploy Microsoft Sentinel in production environment integrating with Microsoft and non-Microsoft solutions

Remote monitoring* of Microsoft Sentinel incidents and proactive threat hunting to discover attack indicators

Discover threats to on-premises and cloud environments across email, identity, endpoints, and third-party data

Recommend next steps on how to proceed with a production implementation of Microsoft Sentinel and the Unified SecOps Platform

Why Swiss Post Cybersecurity?

When it comes to security, you need an experienced partner.

At Swiss Post Cybersecurity, we offer security solutions developed and operated in Switzerland to protect the data and digital information of companies and public authorities. We are a Microsoft Security Solutions Partner specializing in Threat Protection and Cloud Security. We are also a Cloud Protection Qualified provider.

We use Microsoft solutions every day at our Cyber Defense Center including Microsoft Sentinel and Defender XDR for comprehensive protection. Our expertise covers: Identity Threat Detection, Communication and Collaboration Threat Detection, Azure Threat Detection and Threat Intelligence.
